

Chosen to protect the precast boundary walls and civic areas of the Scottish Parliament buildings

anti graffiti

Enviroguard - Scottish Parliament Buildings, Holyrood, Edinburgh

Enviroguard

Award winning, environmentally friendly, invisible and weatherproof anti-graffiti coating for use on all porous surfaces. With Enviroguard it is now possible to undertake preventative measures against the damaging influences of weathering, air borne chemical pollution and graffiti at a low cost both in financial terms and environmental impact. Chosen to protect the Scottish Parliament buildings after 2 years of extensive testing against competing products.

- Invisible building surface protection on porous stone, brick and concrete facades
- Low cost graffiti protection
- Single component system
- Protective hydrophobic properties
- Environmentally friendly water based product containing no solvents or other eco-damaging substances
- Allows treated surfaces to breathe
- Easily remove graffiti with hot water
- Proven track record
- Saves labour, material and maintenance costs
- Can be used on all porous surfaces
- 5-7 years service life
- Award winning for both innovation and environmental improvement
- Class "O" on mineral surfaces - no fire or flame spread risk
- Widely used in prestigious building projects
- Specified by architects, local councils and housing associations
